Traduzione in lingua inglese del Vademecum "A scuola in sicurezza" pubblicato il 10/09/2020 ad uso dei genitori degli alunni stranieri della Scuola Secondaria di I° grado.

English translation of the Vademecum "At school in safety" published on 10/09/2020 for the use of the parents of foreign students of the lower secondary school.

I.C. Via dal VERME - Rome

AT SCHOOL IN SAFETY

TO PARENTS for the return to school of their children

To get your children back in SAFETY, we indicate the correct behaviors to adopt with a sense of RESPONSIBILITY and RESPECT towards the community:

TEMPERATURE: Parents have to measure their children 's temperature at home every morning (see Covid 19 Report of the I.S.S.n.58/2020). In the presence of temperature equal to or greater than 37.5 ° or other symptoms (cough and / or cold, headache, sore throat, vomiting or diarrhea, difficulty breathing, muscle aches, loss or decrease of smell or taste) or if in the last 14 days they have come into contact with people suffering from COVID or in precautionary isolation, parents must not absolutely send their children to school.

MASK: pupils over the age of 6 must wear surgical masks at the entrance (masks with valves are strictly prohibited). It is advisable to always keep a spare mask in your backpack, properly closed in a plastic bag, in case of breakage or loss.

HYGIENE: make the correct hand washing techniques habitual even at home, especially before and after eating, sneezing, coughing,

before adjusting the mask, before touching non-personal material, explaining to your children why it is important. If it's a child, make it fun.

Provide sufficient paper handkerchiefs daily.

Frequently wash and sanitize clothes and aprons worn at school.

Have a personal gel vial in the backpack.

Explain the correct use of toilets: teach not to drink by sticking to the taps, remember to sanitize hands before and after going to the bathroom.

MATERIAL AND FOOD: it is absolutely forbidden to share material and food, not for selfishness, but for safety !! Each pupil must use only their own school material on which to indicate their name. The same goes for food, which must never be shared or given, with particular attention to the moments of the snack and the canteen.

ENTRY / EXIT: strictly respect both the accesses assigned for the various classes, and the times indicated for entry and exit, avoiding arriving late at school. Parents and their children must absolutely avoid gatherings outside the school buildings.

CONTACTS: provide the school with up-to-date personal or business telephone contacts and those of a family member or delegate to be always available if the child feels ill during school hours.

SPECIAL NEEDS: report any special needs related to health or safety to the school by contacting the school office.

Thanks for your cooperation, availability and sense of responsibility!
